2012	Carrie Fraser for creating and chairing the National Working Group on Personal Service establishments for the past two years. During an excellent presentation to the Canadian Council of Medial Officers of Health she spoke about challenges faced nationally due to the growing depth of personal services that are available to the public and how most of these procedures are not regulated.	Inverness, Nova Scotia
2013	The New Brunswick Office of the Chief MOH, lead by Dr. Elish Cleary for leadership in devising sound public health advice and recommendations for the NB Gov't. & people of NB, on potential effects of having Shale Gas Industry in the province. The Sept. 2012 report titled "Chief Medical Officer of Health's Recommendations Concerning Shale Gas Development in New Brunswick" to the GNB & publicly is the only report of its kind in Canada from a health perspective. Partnering with the U of NB & First Nations public sessions reviewed the report's recommendations and responded to questions and/or concerns. Transparency was a key to ensure citizens have an understanding of the health risks.	Saint John, NB
2014	During his 36 year long career Jim Chan demonstrated leadership in the communication of food safety issues to general public and his colleagues. For many years Jim was a media spokesperson for Toronto Public Health. During times of culinary crisis Jim, as the trusted and knowledgeable face of food safety in Toronto, educated the public on the importance of food safety and what steps the public could take to protect themselves. In his retirement Jim continues to be a strong advocate for the profession and food safety, starring in the recent nationally broadcasted CBC Market Place: Canada's Restaurant Secrets.	Toronto, Ontario
2015	Alberta Health Services Personal Services Technical Advisory Panel is recognized for collaboration and innovation in the creation of tools and resources to enhance the abilities of many Environmental Public Health Professionals in Alberta and across Canada. This will in turn assist those in the personal services industry and thus better protect the health of Canadians using those services.	Calgary, Alberta
